**POOL
CONTROLS**

| *Balance Experience Innovation*

Bringing you
innovative Australian-made
water management systems
since 1980

Welcome to the new Pool Controls Product Catalogue for the 2018-19 season.

Included are details of our full range of products, including the new SWC range of salt water chlorinators and XLS 900ppm range of extra low salt chlorinators – as well as the existing Chemigem, Gemini and SG range.

Our commitment to you

3 Year Manufacturer's Warranty on New Domestic Installations	4
2 Year Manufacturer's Warranty on Key Genuine Spare Parts	5

Warranty

Experience you can rely on

Pool Controls is 100% Australian-owned and has specialised in innovative swimming pool sanitation since 1980.

All Pool Controls products are manufactured in Australia and are backed by a 3 year Manufacturer's Warranty on all new domestic installations – see opposite page for full warranty terms. For commercial installations, please visit www.poolcontrols.com.au to download a copy of our commercial warranty terms.

Pool Controls takes pride in the reliability and track record of all our products and in addition provides great after-care via our National Service Team and network of Authorised Technicians. We also provide a 2 year Manufacturer's Warranty on all genuine Pool Controls spare parts – including multi-electrodes (probes), solenoid valves and electrolytic cells – see next page for full warranty terms.

Pool Controls

Manufacturer's Warranty

Pool Controls products come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. The benefits under this warranty are in addition to other rights and remedies under a law in relation to the goods.

3 Year warranty on new domestic installations

Pool Controls warrants its products used in new domestic installations to be free from defects in material and/or workmanship for a period of 3 years from the original date of purchase or installation.

2 Year warranty on replacement parts

Pool Controls warrants its replacement parts used in domestic installations, including multi-electrodes (probes), solenoid valves and electrolytic cells (but excluding wearing parts such as tubing and squeeze tubing) to be free from defects in material and/or workmanship for a period of 2 years following purchase.

Exclusion for wearing parts

This warranty does not extend to wearing parts, in particular the squeeze tubes fitted in peristaltic dosing pumps. Squeeze tubes should be replaced every twelve months by a suitably qualified technician. Pool Controls is not liable for any failure of its products or other damage caused by failure of a squeeze tube that has been used for more than twelve months.

Warranty obligations of Pool Controls

If a defect in workmanship or materials in any Pool Controls product covered by this warranty is discovered during the term of the warranty, and provided the warranty holder follows the procedure set out below, Pool Controls will repair or replace that item at the option of the warranty holder.

Procedure for claiming under this warranty

In order to claim under this warranty, the warranty holder must:

- Contact Pool Controls Service as soon as possible after the discovery of the defect and in any event, within the relevant warranty period;
- Confirm date of installation;
- Confirm that the installation was completed by a suitably qualified technician, as set out in the installation manual; and
- If required, arrange for the relevant Pool Controls' product to be returned to Pool Controls for repair, and the warranty holder is responsible for the cost and risk of any freight or transportation to and from Pool Controls.

Call out fees

- This is a "Back to Base" Warranty, which means that if the Pool Controls product needs to be serviced, replaced or repaired at a place other than Pool Controls' premises, a call out fee will be charged to cover the cost of travel by an authorised Pool Controls technician. Please note that this call out fee will NOT be charged when the relevant Pool Controls product is returned to Pool Controls for repair.
- If an authorised Pool Controls technician repairs or replaces a Pool Controls Product and this warranty does NOT apply, a fee for labour and parts supplied will be charged in addition to the call out fee.
- If the Pool Controls product needs to be returned for repairs under this warranty, the warranty holder is responsible for the cost and risk of any freight or transportation to and from Pool Controls.

Warranty exclusions

This warranty is for domestic installations only. Where Pool Controls products are installed for a commercial application this warranty does not apply.

This warranty extends to the original owner only, beginning on the date of installation and is not enforceable by any other party without the prior written consent of Pool Controls.

Pool Controls is not responsible for any cost of freight or transportation to or from its Service Department.

Pool Controls is not liable under this warranty if the installation of the Pool Controls product was not carried out by a suitably qualified technician.

To the extent permitted by law, Pool Controls is not liable for:

- any incidental or consequential loss incurred in connection with the removal or replacement of the Pool Controls product under this warranty; or
- product failure resulting from misuse, freezing, accident, negligence, improper installation or inadequate maintenance.

To the extent permitted by law, Pool Controls disclaims all other warranties, either express or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose with regard to Pool Controls products, parts and/or any accompanying written materials.

Chemigem

Chemigem

Proven reliability, innovative evolution

The Chemigem Range of chemical dosing systems is where it all started for Pool Controls.

Since 1980, this innovative product has continued to evolve and today's range provides total control over sanitiser levels and pH in either domestic or commercial applications. The Chemigem uses a multi-electrode (probe) to analyse water quality whenever the system is running and adds precise doses of chlorine and acid to maintain optimum water quality.

Take the guesswork out of managing your pool water chemistry and keeping it clean and safe to swim in. With a Chemigem, the "hit and miss" methods of dosing by hand are a thing of the past. Pool chemistry is regulated automatically - providing optimum levels of water sanitation while using less chlorine and acid. This means you get a better result and save money!

Pool Controls offers a range of Chemigems to suit varied applications and each can be programmed to control other pool accessories such as pool lighting and in-floor cleaning systems.

Chemigem D10

Domestic Controllers

The Chemigem Range of chemical dosing systems is where it all started for Pool Controls. The Chemigem D10 is suitable for domestic pools of all shapes and sizes and gives you total control over sanitizer levels and pH. The Chemigem uses a multi-electrode (probe) to analyse water quality whenever the system is running and adds precise doses of chlorine and acid to maintain optimum water quality.

Dosing can be via the highly-efficient solenoid valves or peristaltic pumps. The Chemigem can also be used to control a salt chlorinator for those who prefer salt or mineral pools.

Chemigem D10 Dual Valve

PRODUCT CODE - 00112001

RRP \$2,750

Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer.
Supplied with double solenoid valves.

Chemigem D10 P Dual Pump

PRODUCT CODE - 00112005

RRP \$2,750

Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer.
Supplied with peristaltic pumps.

Chemigem D10 VP Single Valve

PRODUCT CODE - 00112002

RRP \$2,568

Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled via a single solenoid valve.

Chemigem D10 CP Single Pump

PRODUCT CODE - 00112008

RRP \$2,568

Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled via a single peristaltic pump.

Commercial Controllers

Cost effective water management solutions for commercial aquatic facilities

The Chemigem CM55 is a fully-automated water management system suitable for commercial applications of all sizes. Health regulations in many Australian States require water chemistry to be automated and the Chemigem CM55 provides a reliable, cost-effective solution for public aquatic facilities.

Chemicals are precisely dosed via either highly-efficient solenoid valves or commercial-sized D1500 peristaltic dosing pumps. You can purchase a Chemigem CM55 Complete, which includes a pair of D1500 dosing pumps and a commercial injection point, or the components of the Chemigem CM55 can be purchased separately.

Pool Controls is proud to offer a twelve month warranty on CM55 units and spare parts used in commercial and semi-commercial applications. Please contact Pool Controls for full commercial warranty terms.

Chemigem CM55

Chemigem CM 55 Complete

CM55 Commercial chlorine and pH controller supplied complete with pair of D1500 peristaltic pumps and commercial injection point.

PRODUCT CODE - 00413008

RRP \$7,700

Chemigem CM 55 V

PRODUCT CODE - 00413001

RRP \$6,900

CM55 Commercial chlorine and pH controller with single pair of solenoid valves and commercial injection point.

Chemigem CM 55 VV

PRODUCT CODE - 00413003

RRP \$7,700

CM55 Commercial chlorine and pH controller with two pairs of solenoid valves and commercial injection point for rapid addition of chlorine and acid.

Chemigem CM 55 - Controller Only

PRODUCT CODE - 00413002

RRP \$6,900

CM55 Commercial chlorine and pH controller (pumps sold separately).

Salt Water Chlorinators

Packed with all the features of our SG series chlorinators, the SWC range utilises a new electrolytic cell design and comes in a variety of new output sizes – 15g/hr, 25g/hr, 35g/hr, 45g/hr and 60g/hr. All sizes are available with optional pH upgrade systems.

Salt Water

3 Year Warranty

Fresh Water

Optional pH Control

Mineral Water

Made in Australia

The new SWC range builds on the Pool Controls SG range of salt water chlorinators and come in a range of additional sizes to suit all applications. Larger pools and those with warmer water and greater bather load are likely to have increased chlorine demand – and this is where a larger sized salt water chlorinator can help.

The new SWC 15, SWC 25 and SWC 35 are fully-automated systems that produce 15g/hr, 25g/hr and 35g/hr of chlorine respectively. Proudly Australian-designed and manufactured, the SWC range is comes with optional additional timed power outlets for pool lighting or accessories.

The new SWC 45 and SWC 60 are the heavyweights of the range and are manufactured in a metal enclosure that will withstand the toughest conditions. The SWC 45 produces 45g/hr of chlorine and the SWC 60 produces 60g/hr – and are able to meet increased chlorine demand with ease.

SWC Range	PRODUCT CODE	RRP
SWC 15 Salt Chlorinator	00122063	\$1,500
SWC 15T Salt Chlorinator	00122064	\$1,680
SWC 25 Salt Chlorinator	00122025	\$1,725
SWC 25T Salt Chlorinator	00122061	\$1,915
SWC 35 Salt Chlorinator	00122035	\$2,050
SWC 35T Salt Chlorinator	00122062	\$2,140
SWC 45 Salt Chlorinator	00122045	\$2,455
SWC 45pH Salt Chlorinator	00122046	\$2,755
SWC 60 Salt Chlorinator	00122060	\$3,740
SWC 60pH Salt Chlorinator	00122066	\$4,040

The SWC range of salt water chlorinators utilises the new Pool Controls electrolytic cell design.

This robust cell comes in a range of new sizes – 15g/hr, 25g/hr, 35g/hr, 45g/hr and 60g/hr. It is reverse-polarity (self-cleaning) and is simple to install.

Pool Controls tried-and-tested pH dosing system is available as an optional extra on all SWC models.

Keeping the pH of your pool water within the correct range is essential to ensure the sanitiser works efficiently. The pH system is available as a separate “plug-and-play” upgrade kit for the SWC 15, SWC 25 and SWC 35, with pH regulated via a separate peristaltic dosing pump (pictured). The pH dosing system is incorporated into the larger SWC 45pH and SWC 60pH control units. ***See page 17 for more details.***

XLS**900PPM**

A Freshwater Experience

with the new XLS 900 chlorinator

Enjoy a freshwater experience while safely sanitising your pool or spa with the XLS 900.

The latest innovative product from Pool Controls operates on extra-low salt concentrations (900 ppm). At this concentration, the salt is on the threshold of being perceptible by taste – so it's like swimming in freshwater!

Fully Automated

Self Cleaning

3 Year Warranty

Optional Timed Power Outlets

Optional pH Control

Made in Australia

To put things in perspective, seawater has a salt concentration of around 30,000ppm. Conventional saltwater chlorinators operate at concentrations of between 3000 and 6000ppm. The XLS 900 works effectively at concentrations of around 900 ppm – and it's worth remembering that tap water often has salt concentrations of around 200ppm.

A great freshwater experience is also kind on the environment.

Less salt in the water will protect your pool and equipment from corrosion. You can further enhance your freshwater experience and optimise the effectiveness of your sanitiser with a Pool Controls XLS pH upgrade kit.

[See page 17 for details](#)

XLST | **900PPM**

The XLST 900PPM 18 and 28 have all the features of the XLS 900 PPM, but also come with 3 timed power outlets to allowing you to power the pool pump, auxiliary equipment such as UV or ozone sterilisers plus a third outlet for pool lighting.

<i>XLS 900 Salt Chlorinator</i>	<i>PRODUCT CODE</i>	<i>RRP</i>
XLS 18 900 PPM Low Salt Chlorinator	00122017	\$1,870
XLS 18T 900 PPM Low Salt Chlorinator	00122020	\$2,079
XLS 28 900 PPM Low Salt Chlorinator	00122027	\$2750
XLS 28T 900 PPM Salt Chlorinator	00122028	\$3,080

Pool Controls XLS pH Upgrade Kit

When you upgrade your system with a Pool Controls pH upgrade kit, the pH of the pool water is automatically controlled via a single peristaltic pump. This helps maintain perfect water chemistry and optimises the effectiveness of the sanitiser.

See page 17 for more details.

SG Series Salt & Mineral Water Chlorinators

SG Series

Now available with 10g/hr output in addition to the 20g/hr and 30g/hr output available previously - plus optional additional timed power outlets to control lighting and cleaning accessories.

For those who prefer a mineral water pool, the SG 30T Mineral is the perfect choice. You may also choose to upgrade any of the SG Series with the optional pH upgrade kit to help optimise pool water chemistry (See page 17 of this catalogue for details of the pH Upgrade Kit)

The ultimate control system

Pool Controls provides a versatile range of innovative automated systems for those that prefer a salt or mineral pool. All Pool Controls salt or mineral systems feature reverse polarity (self-cleaning) electrolytic cells as standard.

SG Series SG Salt Water Chlorinators	PRODUCT CODE	RRP
SG 10 Salt Chlorinator	00122065	\$1,350
SG 10T Salt Chlorinator	00122067	\$1,500
SG 20 Salt Chlorinator	00122001	\$1,575
SG 20T Salt Chlorinator	00122002	\$1,785
SG 30 Salt Chlorinator	00122004	\$1,870
SG 30T Salt Chlorinator	00122005	\$2,079
SG 30T Mineral Chlorinator	00122009	\$2,079

Gemini

The Gemini Twin System is our flagship product, representing the ultimate control system for salt or mineral pools.

The Gemini Control unit analyses water quality via a multi-electrode probe and activates the Gemini Salt or Mineral chlorinator as needed. The pH of the water is also monitored and adjusted with precise doses of acid via a peristaltic pump.

<i>Gemini Twin System</i>	PRODUCT CODE	RRP
Gemini 20 P	00112028	\$3,900
Gemini 30 P	00112012	\$3,996
Gemini 30 Mineral	00112014	\$3,996

SteriSel

Sterisel Saltwater Chlorinators

Developed for the European market, the Sterisel is a saltwater chlorinator designed to operate with a timed controller (such as the Chemigem D10 VP or CP).

<i>Sterisel Saltwater Chlorinators</i>	PRODUCT CODE	RRP
Sterisel 20	00122013	\$1,560
Sterisel 30	00122014	\$1,855

Accessories and Spare Parts

Upgrade your Pool Controls products with these purpose-built accessories.

Power Separators

The Pool Controls Power Separator enables a range of devices to be controlled automatically by the Chemigem D10 or the Gemini Control Unit, for example, in-floor cleaning systems.

Pool Controls produces a range of different Power Separators suitable for use with the full range of controllers and a wide variety of pool accessories. Pool Controls is happy to advise on the best option to suit your particular application.

Pool Controls Power Separator 12V

Product Code - 00112020

RRP \$225

Pool Controls Power Separator 24V

Product Code - 00112021

For use with a SG Series Saltwater Chlorinator.

RRP \$225

Pool Controls Power Separator 240v

Product Code - 00112022

Standalone power separator which can be used with a range of controllers.

RRP \$225

Venturi Injectors

Venturi Injection Kit 40-50mm

Product Code - 14050001

RRP \$198

Venturi Manifold

Product Code - 14050002

RRP \$220

Venturi Injector Bayonet

Product Code - 14161301

RRP \$99

Venturi Injector Threaded

Product Code - 14161306

RRP \$99

pH Upgrade Kit

Maintain Optimum Balance

The Pool Controls Upgrade Kits use a sophisticated inbuilt algorithm developed by Pool Controls to calculate how much acid is required to adjust the pH of the swimming pool water.

Pool Controls SG Series pH Upgrade Kit
Product Code - 00122016

Provides pH control in Salt or Mineral Pools via peristaltic pump.

RRP \$490

Pool Controls SWC & XLS pH Upgrade Kit
Product Code - 00122019

Provides pH control via peristaltic pump (for use with the SWC Series and XLS 900PPM Saltwater Chlorinator)

RRP \$490

When you upgrade your system with a Pool Controls pH upgrade kit, the pH of the water is automatically controlled by doses of diluted acid (2:1) via a single peristaltic pump.

This helps maintain perfect water chemistry and optimises the effectiveness of the chlorine sanitiser.

Over time, the addition of chlorine has the effect of raising the pH of swimming pool water and if it is not brought back into the desirable range, the chlorine will become steadily less effective. If the pH rises too much, the pool water will become alkaline and possibly cloudy. Upgrading your SG Series SWC Series or XLS 900PPM chlorinator will keep your pool water looking and feeling great!

The pH upgrade kit is simple to install and because it does not rely on a probe, no calibration is required. It can be installed on an existing unit and is "plug-and-play". Once connected, the system recognises the pH upgrade and activates the pH algorithm.

Importance of Regular Maintenance and Correct Installation

Regular maintenance will ensure you maximise your investment in your swimming pool and your Pool Controls Equipment.

Certain items are "wearing parts" and require regular checking and replacement – particularly the squeeze tubes used in peristaltic pumps, which should be replaced every 12 months. Other tubing should be checked at least annually and replaced if necessary.

All Pool Controls products should be installed by a suitably qualified technician to ensure correct operation and warranty cover.

Tubing Maintenance Kits

Pool Controls have introduced a range of Tubing Maintenance Kits, which include all the spare parts you will need to properly maintain your squeeze tubes and feed tubing.

Choose from the Single Pump, Dual Pump and Commercial Tubing Maintenance Kits depending on your installation. Each Kit contains replacement squeeze tube (or tubes), sachet of silicone grease, 6m roll of feed tubing and for dual pump kits, a pre-assembled gas loop with connectors.

Single Pump Tubing Maintenance Kit

Product Code - 09061085

RRP \$99

Dual Pump Tubing Maintenance Kit

Product Code - 09061084

RRP \$198

About Spare Parts

**2 Year warranty
on probes,
valves & cells**

All genuine Pool Controls spare parts used in domestic applications are now covered by a full 2 year Manufacturer's Warranty from the date of purchase. This warranty cover includes replacement power supplies, multi-electrodes (probes), solenoid valves and electrolytic cells (see page 5 for full warranty terms).

Pool Controls takes pride in the reliability and track record of all its products and in addition to the Manufacturer's Warranty, provides great after-care via our National Service Team and a network of Authorised Technicians.

Electrolytic Cell Spares

Introducing the new Pool Controls electrolytic cell design, which will be supplied with all models in the SWC Series and XLS900PPM Range. This robust new design features an inner housing containing high-grade reverse polarity (self-cleaning) titanium plates and is now connected at the cell head. Cell outputs available range between 15g/hr and 60g/hr – so there is a size to suit almost every application.

*Excerpt from the 1989
Chemigem Catalogue*

A rich history of innovation and service

Pool Controls was established in 1980 when Gordon and Lawrence Hudson launched the original and highly innovative Chemigem. The Chemigem's ability to analyse swimming pool water and accurately dose pools so as to maintain optimum water chemistry revolutionised how we care for our swimming pools.

The Chemigem has evolved considerably since those days and Pool Controls has evolved too. We've gone from a small, family-run, Western Australian business specialising in chemical feeder water management systems to a thriving company selling a wide range of water sanitation systems throughout Australia and around the world.

Pool Controls began producing salt chlorinators in 2008 and each year has seen an expansion of the range. We are fortunate to have Terry Hunter as part of the team. Terry is an electrical engineer and has years of experience with salt chlorinators and pioneered the introduction of the reverse-polarity (self-cleaning) electrolytic cell, which has now become an industry standard.

The swimming pool is an integral part of the Australian way of life and our high level of pool ownership makes us the envy of the world. Maintaining a beautiful pool so that it's safe and healthy to swim in can be frustratingly complex – but Pool Controls products can certainly help lighten the load. The Pool Controls team has a wealth of knowledge, which we're happy to share! If you have a question about pool chemistry or any of the products in the Pool Controls range, please don't hesitate to give us a call or contact us via our website – we look forward to hearing from you!

Training Opportunities with Pool Controls

After 38 years' experience, Pool Controls is able to offer expert, balanced advice on many areas of pool chemistry and automation.

*You can contact
Pool Controls on
1300 550 010*

*Make a
"Quick Enquiry" via
poolcontrols.com.au*
