A Freshwater Experience

with the new XLS 900 chlorinator

XLS **900PPM**

Enjoy a freshwater experience while safely sanitising your pool or spa with the XLS 900.

The latest innovative product from Pool Controls operates on **extra-low salt concentrations (900 ppm)**. At this concentration, the salt is on the threshold of being perceptible by taste – so it's like swimming in freshwater!

To put things in perspective, seawater has a salt concentration of around 30,000ppm. Conventional saltwater chlorinators operate at concentrations of between 3000 and 6000ppm. The XLS 900 works effectively at concentrations of around 900 ppm – and it's worth remembering that tap water often has salt concentrations of around 200ppm.

A great freshwater experience is also kind on the environment.

When you backwash your pool or spa, you won't be dumping large amounts of salty water. Extra low concentrations of salt also help protect your investment in your pool or spa. Metal accessories will no longer rust quickly and concrete surfaces are protected from the hardening that can occur with high concentrations of salt. High salt concentrations can be extremely harsh on pool surrounds – but this sort of damage can be prevented by using an XLS 900.

Packed with features

Fully Automated

Self-cleaning cell

3 Year Warranty

Timed Power Outlets

Optional pH Control

XLS 900PPM

A Freshwater Experience

The XLS 900 is the latest innovative offering from Pool Controls and operates effectively at extra-low concentrations of salt. The salt is barely perceptible by taste and the experience is like swimming in fresh water.

Using an XLS 900 means saying goodbye to lugging heavy bags of salt back from the pool shop. The XLS 900 is kinder to you, your pool and surrounds – not to mention the environment!

XLST 900PPM

XLST 900PPM

The XLST 900PPM has all the features of the XLS 900 PPM, but also comes with 3 timed power outlets to allowing you to power the pool pump, auxiliary equipment such as UV or ozone sterilisers plus a third outlet for pool lighting.

Pool Controls XLS pH Upgrade Kit

When you upgrade your system with a Pool Controls pH upgrade kit, the pH of the pool water is automatically controlled via a single peristaltic pump. This helps maintain perfect water chemistry and optimises the effectiveness of the sanitiser.

The Pool Controls XLS pH Upgrade Kit provides pH control in extra low salt pools via peristaltic pump (for use with the XLS 900PPM Saltwater Chlorinator).

Talk to a pool controls expert and gain from the best of Australian designed and manufactured water management systems for your home pool.

Choose from an extensive range of award-winning, energy efficient, automated water management systems.
