

Innovation
that works
for You.

The past three years have highlighted the importance of innovation. Pool Controls continue to innovate and adapt to change – and we recognise that your pool is as individual as you are.

Pool Controls products can help keep your pool looking beautiful and also ensure the water you swim in is safely sanitised. Choose from our extensive range of salt and mineral chlorinators, our Ozone family of products and chemical feeders that precisely control pH and sanitiser.

An Australian-owned manufacturer, Pool Controls is proud to support the Australian Pool Industry. In keeping with previous years, our Product Catalogue provides Trade Prices (exclusive of GST).

THANK YOU 26

A Fresh Mineral Experience

Pool Controls’ new improved XLM Blend used with our range of extra-low-salt sanitation systems delivers exceptional water quality and clarity while using a fraction of the mineral salts required by conventional systems, so it’s kind to the environment.

Centuries Old Tradition

For centuries people have been bathing in mineral waters and there is considerable evidence that mineral solutions can have beneficial effects on the human body as well as enhancing the bathing experience. Our increasingly stressful lives make the prospect of a rejuvenating and relaxing mineral experience in our own backyard very enticing.

XLS Xtra Low Salt

Find out more about this innovative Xtra Low salt or mineral system on page 12.

XLS and XLM - A perfect partnership

Find out more about the new improved XLM blend of minerals on page 13.

A Fully-integrated System

Find out more about the Ozone XLM with pH on page 15.

The Power of Ozone Ozone XLM with pH

A Fully-integrated System

The Ozone XLM with pH control is an integrated system presented in a single enclosure, minimising the space required for pool equipment and the need to install multiple components. The Ozone XLM combines a powerful corona discharge ozonator with an extra-low mineral salt chlorinator, creating one of the most powerful and efficient sanitisation systems available.

- Fully Integrated
- Self Cleaning
- pH Control
- Potassium Free
- Fresh Water
- 3 Year Warranty
- Made in Australia

Proven reliability, innovative evolution

The Chemigem Range of chemical dosing systems is where it all started for Pool Controls and after 43 years of innovative Australian-made technology, we are proud to introduce the Chemigem D21 – a fully-integrated chemical dosing system with two peristaltic pumps built in to the unit.

Since 1980, this innovative product has continued to evolve and today's range provides total control over sanitiser levels and pH in either domestic or commercial applications. The Chemigem uses a multi-electrode (probe) to analyse water quality whenever the system is running and adds precise doses of chlorine and acid to maintain optimum water quality.

Take the guesswork out of managing your pool water chemistry and keeping it clean and safe to swim in. With a Chemigem, the "hit and miss" methods of dosing by hand are a thing of the past. Pool chemistry is regulated automatically - providing optimum levels of water sanitation while using less chlorine and acid. This means you get a better result and save money!

Pool Controls offers a range of Chemigems to suit varied applications and each can be programmed to control other pool accessories such as pool lighting and in-floor cleaning systems.

Chemigem classic

Domestic Controllers

The Chemigem D10 and D21 are both suitable for domestic pools of all shapes and sizes and gives you total control over sanitizer levels and pH. The Chemigem uses a multi-electrode (probe) to analyse water quality whenever the system is running and adds precise doses of chlorine and acid to maintain optimum water quality.

Dosing can be via the highly-efficient solenoid valves or peristaltic pumps. The Chemigem D21 has the peristaltic dosing pumps built into the unit. The Chemigem can also be used to control a salt chlorinator for those who prefer salt or mineral pools.

Chemigem D21	Product Code - 00112009	Price Exc GST \$2,911
---------------------	--------------------------------	------------------------------

Fully-integrated chlorine and pH controller suitable for most pools, with built-in pool circulation timer. Supplied with integrated peristaltic dosing pumps.

Chemigem D10 Dual Valve	Product Code - 00112001	Price Exc GST \$2,911
--------------------------------	--------------------------------	------------------------------

Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer. Supplied with double solenoid valves.

Chemigem D10 P Dual Pump	Product Code - 00112005	Price Exc GST \$2,911
---------------------------------	--------------------------------	------------------------------

Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer. Supplied with peristaltic pumps.

Chemigem D10 VP Single Valve	Product Code - 00112002	Price Exc GST \$2,711
-------------------------------------	--------------------------------	------------------------------

Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled via a single solenoid valve.

Chemigem D10 CP Single Pump	Product Code - 00112008	Price Exc GST \$2,711
------------------------------------	--------------------------------	------------------------------

Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled via a single peristaltic pump.

CHEMIGEM CM55

CM55 Commercial Controllers

Cost effective water management solutions for commercial aquatic facilities

Price Locked

The Chemigem CM55 is a fully-automated water management system suitable for public aquatic facilities such as apartments, caravan parks, hotels and motels. Health regulations in many Australian States require water chemistry to be automated and the Chemigem CM55 provides a reliable, cost-effective solution for public aquatic facilities. Chemicals are precisely dosed via either highly-efficient solenoid valves or commercial-sized D1500 peristaltic dosing pumps. You can purchase a Chemigem CM55 Complete, which includes a pair of D1500 dosing pumps and a commercial injection point, or the components of the Chemigem CM55 can be purchased separately.

Pool Controls is proud to offer a twelve month warranty on CM55 units and spare parts used in commercial and semi-commercial applications. Please contact Pool Controls for full commercial warranty terms.

Chemigem CM 55 - Controller Only	Product Code - 00413002	Price Exc GST \$6,785
CM55 Commercial chlorine and pH controller (pumps sold separately).		

Ozone Chemigem

The Ozone Chemigem harnesses the power of ozone combined with the precision of the Chemigem dosing system to result in water of unparalleled quality. The Ozone One is installed as a separate, stand-alone ozone generator controlled by the Ozone Chemigem unit. Note that the Ozone One is designed so that it can also be retro-fitted to existing water management systems. Stand alone Ozone One units are also available in black to match existing equipment

How it works?

- 1

Ozone is the frontline of defence against bacteria and other pathogens in the water. Ozone is a powerful sanitiser and leaves no trace in the pool water after treatment.
- 2

The Ozone Chemigem uses a multi-electrode (probe) to monitor the levels of chlorine and the pH of the water.
- 3

Precise doses of liquid chlorine and pool acid are added to the pool as required to provide a safe level of residual sanitiser.

- Powerful Ozone Generator
- Full pH Control
- Safe Sanitiser Residual
- Proudly Manufactured in Australia

Innovative Salt & Mineral Solutions

SG Series Salt & Mineral Water Chlorinators

Pool Controls provides a versatile range of automated systems for those that prefer a salt or mineral pool. All Pool Controls salt or mineral systems feature reverse polarity (self-cleaning) electrolytic cells as standard.

SG Series

Now available with 10g/hr output in addition to the 20g/hr and 30g/hr output available previously - plus optional additional timed power outlets to control lighting and cleaning accessories.

SG Series Salt Water Chlorinators

Description	Product Code	Price Exc GST
SG10 10g/hr Salt Water Chlorinator	00122065	\$1,517
SG10T 10g/hr Salt Water Chlorinator with additional timed power outlets	00122067	\$1,686
SG20 20g/hr Salt Water Chlorinator	00122001	\$1,767
SG20T 20g/hr Salt Water Chlorinator with additional timed power outlets	00122002	\$2,006

SG30T 30g/hr Salt Water Chlorinator with additional timed power outlets	00122005	\$2,338
SG pH Control (60RPM peristaltic pump)	00122021	\$528

pH Control

Pool Controls offers you the option of pH control with any model of chlorinator. When you enhance your system with a Pool Controls pH Control System, the pH of the water is automatically adjusted with doses of diluted acid via a single peristaltic pump.

Over time, the addition of chlorine raises the pH of the swimming pool water and if the pH is not brought back into the desirable range, the chlorine will become less effective and the water will become cloudy. The Pool Controls pH Control System is simple to install and because it does not rely on a probe, no calibration is required. It can be installed on an existing unit and is “plug and play”. Once connected, the system recognises the pH Control and activates the pH algorithm.”

Salt Water Chlorinators

Pool Controls’ SWC Salt Water Chlorinators are packed with features and comes in a wide range of output sizes – 15g/hr, 25g/hr, 35g/hr, 45g/hr and 60g/hr. The SWC range is suitable for salt or mineral pools and offers a “good, better, best” option for each output size. For those that like to keep things simple, there is a straightforward chlorinator, which represents a “good” option for many pool owners.

A “better” option is the “T” model, which includes two additional timed power outlets to control pool accessories such as pool or garden lighting. The “best” option is provided by the “pH” model, which includes an integrated algorithmic pH Control system in addition to the 3 timed power outlets, offering pool owners full functionality in one unit. (Note that a separate pH Control system can be retro-fitted to any SWC Chlorinator at a later date if desired).

- Salt Water
- Mineral Water
- Self Cleaning Cell
- Optional pH Control
- 3 Year Warranty
- Made in Australia

All SWC chlorinators have a built-in “cover-mode”, which at the touch of a button, reduces chlorine output to 20% of normal for when a pool cover is on the pool.

A Freshwater Experience

XLS Xtra Low Salt Extra Low Salt and Mineral Chlorinators

Enjoy a freshwater experience while safely sanitising your pool or spa with the XLS. The latest innovative product from Pool Controls operates on extra-low salt concentrations (as low as 900 ppm). At this concentration, the salt is on the threshold of being perceptible by taste – so it’s like swimming in freshwater!

-  Self Cleaning Cell
-  Optional Timed Power Outlets
-  Made in Australia
-  3 Year Warranty
-  Fresh Water
-  Optional pH Control

Pool Controls XLS chlorinators comes in a wide range of output sizes – 12g/hr, 18g/hr, 23g/hr and 28g/hr. The XLS range is suitable for salt or mineral pools and offers a “good, better, best” option for each output size. For those that like to keep things simple, there is a straightforward chlorinator, which represents a “good” option for many pool owners.

A “better” option is the “T” model, which includes two additional timed power outlets to control pool accessories such as pool or garden lighting. The “best” option is provided by the “pH” model, which includes an integrated algorithmic pH Control system in addition to the 3 timed power outlets, offering pool owners full functionality in one unit. (Note that a separate pH Control system can be retro-fitted to any XLS Xtra Low Salt system at a later date if desired.

All XLS systems have a built-in “cover-mode”, which at the touch of a button, reduces chlorine output to 20% of normal for when a pool cover is on the pool.

Pool Controls’ new improved XLM blend of minerals has been specially formulated to provide optimum water balance and quality. XLM minerals are now richer in magnesium chloride than ever before.

Magnesium Chloride

The health benefits of magnesium are well-documented and are renowned for soothing the skin and relieving muscle tension. The XLM Blend contains the highest percentage (w/w) composition of magnesium chloride (compared to other brands of mineral salts).

Sodium Chloride

Sodium chloride (salt) is the conventional precursor to producing chlorine by electrolysis. The XLM blend of minerals contains a small proportion of sodium chloride.

Borates

Boracic acid (also known as borates) are highly effective water enhancers and used extensively in the USA. Bathers experience luxurious, softened water that feels silky to the touch. Borates also act as a pH buffer and when used with the XLS System that integrates algorithmic pH dosing, maintaining optimum water chemistry is a breeze!

The Power of Ozone

Ozone SWC with pH

A Fully-integrated System

Our Ozone Family of products has been expanded with the addition of Ozone SWC and the stand-alone Ozone One ozone generator.

The popular SWC salt water chlorinators come in a wide range of output sizes to suit any pool – and are now available with a powerful ozone generator and algorithmic pH control incorporated into one unit.

- ✓

Powerful sanitation provided by ozone
- ✓

Optimum water balance with algorithmic pH control
- ✓

Convenience of a saltwater chlorinator to provide a safe residual
- ✓

Suitable for use in conventional salt or mineral salt pools

The Ozone One is a stand-alone ozone generator which can be retro-fitted to existing Pool Controls salt or mineral water systems. Stand alone Ozone One units are also available in black to match existing equipment

Ozone SWC Family	Product Code	Price Exc GST

OZONE XLM

The Ozone XLM introduces the power of Ozone to Pool Controls' range of innovative mineral water chlorinators.

These systems are designed to be most effective at extra low concentrations of salt or mineral – reducing initial setup and ongoing maintenance costs. Ozone XLM units also integrate pH control and come in a variety of output sizes to suit a wide range of pools – 12g/hr, 18g/hr, 23g/hr and 28g/hr.

How it works?

- 1

Ozone is the frontline of defence against bacteria and other pathogens in the water. Ozone is a powerful sanitiser and leaves no trace in the pool water after treatment.
- 2

The XLM chlorinator provides a safe residual disinfectant at extra low concentrations of mineral salts. The XLM chlorinator has a specially engineered electrolytic cell that runs at extra-low TDS.
- 3

pH control enhances the effectiveness of the sanitiser by maintaining the pH of the water in the correct range. The algorithmic pH doser is incorporated into the unit.

Controlled Salt
Sanitation Systems

The Gemini CX is a fully integrated ORP-controlled salt (or mineral) chlorinator with pH control.

The Gemini Control unit analyses water quality via a multi-electrode probe and activates the SteriSel salt or mineral chlorinator as needed. The pH of the water is also monitored and adjusted with precise doses of acid via a peristaltic pump.

Controlled salt systems potentially provide pool owners with the best of both worlds – the precision of an ORP-controlled system and the convenience of salt chlorination. However, these sophisticated systems require other aspects of water chemistry to be well-maintained if they are to operate effectively.

If you are considering this type of system for your pool, ensure you have a good grasp of swimming pool water chemistry so that you get the most out of your investment.

Gemini CX

Description	Product Code	Trade Price

Accessories & Spare Parts
2 Year Warranty

All genuine Pool Controls spare parts used in domestic applications are now covered by a full 2 year Manufacturer's Warranty from the date of purchase.

This warranty cover includes replacement power supplies, multi-electrodes (probes), solenoid valves and electrolytic cells. Visit poolcontrols.com.au for full warranty terms. Pool Controls takes pride in the reliability and track record of all its products and in addition to the Manufacturer's Warranty, provides great after-care via our National Service Team and a network of Authorised Technicians.

Importance of Regular Maintenance and Correct Installation

Regular maintenance will ensure you maximise your investment in your swimming pool and your Pool Controls Equipment. Certain items are “wearing parts” and require regular checking and replacement – particularly the squeeze tubes used in peristaltic pumps, which should be replaced every 12 months. Other tubing should be checked at least annually and replaced if necessary. All Pool Controls products should be installed by a suitably qualified technician to ensure correct operation and warranty cover.
